

Burrow Global Automation provides engineering, design, procurement and installation of DCS's, PLC's, RIE's, substations and field labs. With an eye for continuous operation, our automation team holds an outstanding record for hot cutovers.

Our Project Team

- 30+ years of successful execution of major DCS projects under budget and ahead of schedule
- Large and small upgrades, retrofit projects, turnkey project execution and sub systems integration
- Control system specialists and instrument technicians for pre-commissioning, commissioning, startup and initial operations for control systems & DCS
- Exceptional record of +1MM I/O hot cutovers with no shutdowns

Our Specialties

- Modular applications, open rack marshalling, turnkey control rooms, RIE's, analyzer shelters, substations & field labs
- Field due diligence, inspection and conversion
- DCS / SCADA / PLC / RTU / SIS / CEMS / PEMS
- Advanced Process Control
- PLC and DCS programming
- DCS operator training

Our Experience

- Honeywell TDC 3000 & Experion
- Moore APACS/Quadlog
- Foxboro I/A
- Emerson Provox & Delta V
- Siemens PCS7 & TI PLC
- Allen Bradley Control Logics, PLC 5, SLC 500
- ICS Triplex Advance TMR Safety System
- Triconix Safety System
- Modicom Quantum & Unity Experience
- Bristol Babcock
- Wonderware Intouch & Archestra HMI
- Rockwell RSView HMI & ME (PanelView Plus)
- GE 9030 PLC, VersaMax PLC & Intellution iFix HMI
- Fisher ROC 809, 407, 300 series, 503
- Oasis / Telvent
- Modbus & Serial Communication

With broad experience and a proven track record, Burrow Global Automation assures safety, quality and value in execution and implementation.
