

Construction

BURROW GLOBAL

For over thirty years, **Burrow Global** has provided general construction services for process industries throughout the United States and abroad with over twenty years without a lost time incident.

Safety

Our goal is ZERO INCIDENTS, to prevent all accidents and to instill a behavior based philosophy of care and compliance. Our safety record has received national recognition and delivers proven results to our clients. Our safety program includes a mentorship program for new hires, BBS with tracked JOC goals, and a BGC permit to work system including JSA's to maintain safety focus in the oil patch.

Service Profile

- EPC execution with strategic office and fab shop locations
- Construction management and direct hire, with self perform crafts including civil, structural, mechanical, piping, electrical, electrical and instrumentation.
- Fabrication (ASME U, R, S, PP code stamps)
- Constructability
- Reliability in Design
- Asset Management
- Commissioning, Startup, Planning & Execution
- Turnaround Management

Quality

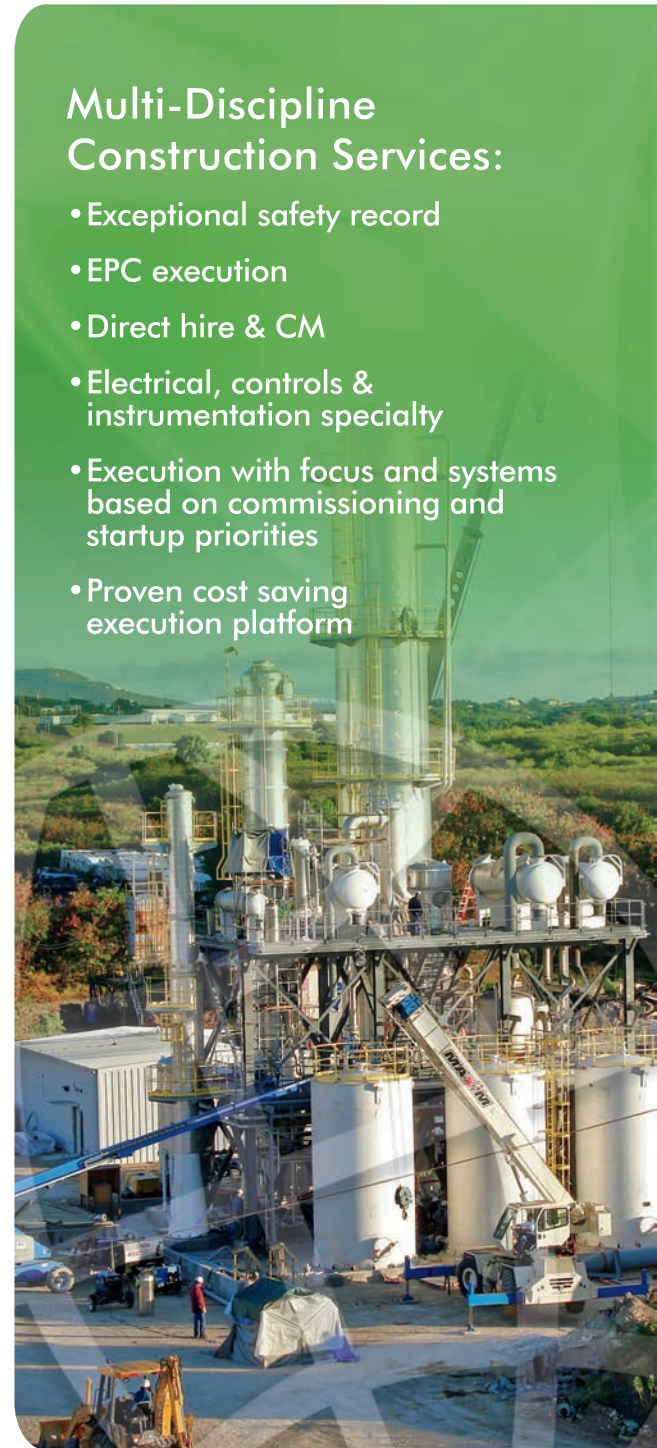

The BGC Quality Program documents and validates that the plant assets have been engineered properly; installed per design and regulatory requirements; and commissioned and started up properly. In order to improve quality and value in project delivery, we have established the following:

- Project focused fabrication shops to control supply chain.
- Multi-discipline in-house inspection services.
- Proven programs and processes optimizing project execution from construction to pre-commissioning, commissioning, and startup with testing programs that combine mechanical completion and pre-commissioning requirements.

At Burrow Global, we redefine project completion as "on-time startup," with emphasis on our experienced staff and proven processes to assure safety, quality and value for our clients.

Multi-Discipline Construction Services:

- Exceptional safety record
- EPC execution
- Direct hire & CM
- Electrical, controls & instrumentation specialty
- Execution with focus and systems based on commissioning and startup priorities
- Proven cost saving execution platform
