An Experienced I&E Construction Team

With an experienced I&E Construction Team, **Burrow Global** delivers premium, high-value services that integrate into each clients' unique project plans. Burrow Global's capabilities extend to commissioning, startup planning and support because we believe completion occurs when the project delivers results for our clients.

Whether your needs are planning, construction management or turnkey execution, take advantage of Burrow Global's knowledgeable I&E Construction team to improve construction quality and streamline project costs and schedule.

Experience Safe, Quality I&E Construction with Burrow Global

- We work closely with clients to construct to site process knowledge/expertise and corporate standards/best practices with a focus on compliance with applicable instrument, electrical and control system standards.
- Leadership by construction managers with significant in-plant I&E Construction experience helps us recognize opportunities and mitigate risks to deliver on-time, on-budget, safely and with quality results.
- Knowledge of all major instrument, electrical and automation vendor products improves our efficiency and provides you with right-first-time results.
- With complete multi-discipline design and engineering capabilities as well as preparation for operations teams, we have turnkey EPC capabilities but offer the flexibility to integrate our I&E construction services to best meet your individual project needs.
