

# Burrow Global Establishes Midstream Services LLC

## Growth and Expanded Service Portfolio Drive Decision

FOR IMMEDIATE RELEASE

HOUSTON, TEXAS (June 21, 2017) On May 11, 2017, Burrow Global LLC Formed Burrow Global Midstream (BGM), a Limited Liability Corporation.

Three years ago Burrow Global LLC formed its midstream division under the guidance of Burrow Global Services President, Leroy Faulk, and the managerial leadership of Saji Samuel, and Girish Sandhane. Since then, industry demand, market share growth and a desire to broaden our midstream services offered has motivated the decision to expand Burrow Global's midstream division into a separate engineering company.

The new company will be called Burrow Global Midstream (BGM). BGM will be an organization solely focused on the midstream industry and will have the capability to provide superior engineering services for Processing Facilities, Pipelines and Terminals, and Surveys and Mapping. This model will enable BGM to respond to market needs with the required flexibility to deliver maximum benefit to our midstream clients. BGM will also be positioned to continue attracting and hiring employees with substantial midstream knowledge and process expertise.

Nigel James, Chief Strategy Officer, said, "We are excited about BGM. It is a significant demonstration of our commitment to the midstream market. Leroy Faulk, Saji Samuel, and Girish Sandhane have successfully grown Burrow Global's midstream division to where we can take this step forward. We appreciate their hard work in establishing Burrow Global as a respected midstream solution provider. It is with excitement and enthusiasm that we look forward to BGM building on that foundation by listening to client needs, growing our service lines and solution portfolios to meet those needs, and continuing to deliver safe, high-quality projects to the midstream industry."

Burrow Global offices in Houston, Texas will house BGM employees until appropriate office space is secured. Information on BGM leadership will be available as the transition progresses.

### **About Burrow Global, LLC:**

Burrow Global, LLC is a full service design, engineering, procurement, and construction services firm with specialties in process automation, industrial buildings, and I&E construction. Quality, high-value services and a commitment to safety combined with broad industry experience and comprehensive expertise make Burrow the global provider of choice for many major companies. Founded in November of 2009 by CEO and Board Chairman Michael L. Burrow, P.E., Burrow Global is a privately held firm that has exhibited substantial growth since 2010.
