## Burrow Global, LLC Awarded \$60MM Gulf Coast EPC Project

### **Texas Specialty Chemical Plant Values Burrow Global's Process Design Knowledge and Operational Familiarity**

FOR IMMEDIATE RELEASE

HOUSTON, TEXAS (May 21, 2015) Burrow Global, LLC (Burrow), a full-service EPC Company, has been selected to provide engineering, procurement, construction, commissioning and startup services for a

\$60MM new processing unit which will be integrated with an existing Gulf Coast Specialty Chemical Plant. Burrow Global completed the Phase 2 Front-End-Loading (FEL) in early 2014 and is currently performing the FEL 3 work. The new unit will feed an existing operating plant in a similar arrangement to other plants owned and operated by the company.

Key decision criteria for Burrow Global's selection included process design knowledge and operational familiarity combined with complete multi-discipline EPC capabilities ranging from conceptual design to plant operations. Burrow Global's history of strong engineering and construction performance at the site was also an important factor in the award as was Burrow's proposal to use a contracting strategy that will cut several weeks off the overall project schedule while providing significant incentives for cost savings. The client indicated Burrow Global was the right size to make the project a priority and to successfully manage and execute it.

Leroy Faulk, President of Burrow Global Engineering, said, "We are excited to continue our multi-discipline EPC work on this project. It is always rewarding and humbling when a client is pleased with our performance and recognizes the benefits of having Burrow Global continue as their partner on a project."

#### **About Burrow Global, LLC:**

Burrow Global, LLC is a full service engineering, procurement, construction, and facility services firm with specialties in process automation, industrial buildings,

plant commissioning and start-up. Premium quality, high-value services and a commitment to safety combined with broad industry experience and comprehensive expertise make Burrow the global provider of choice for many major companies. Founded in November of 2009 by CEO and Board Chairman Michael L. Burrow, P.E., Burrow Global is a privately held firm that has exhibited substantial organic growth since 2010 by using strategic acquisitions to position the company to address the needs of its valued clients. <http://www.burrowglobal.com>
